

▷▷ TRUMBULL CAMPBELL + MANUFACTURERS.

Trumbull Campbell Associates is dedicated to providing quality products—Heating, Ventilation and Air Conditioning systems, cutting edge technology, and superior service—to our customers and clients. **Each manufacturer we have chosen to represent is an industry leader**, creating the technologies needed to meet today's environmental challenges—and adapt to tomorrow's needs.

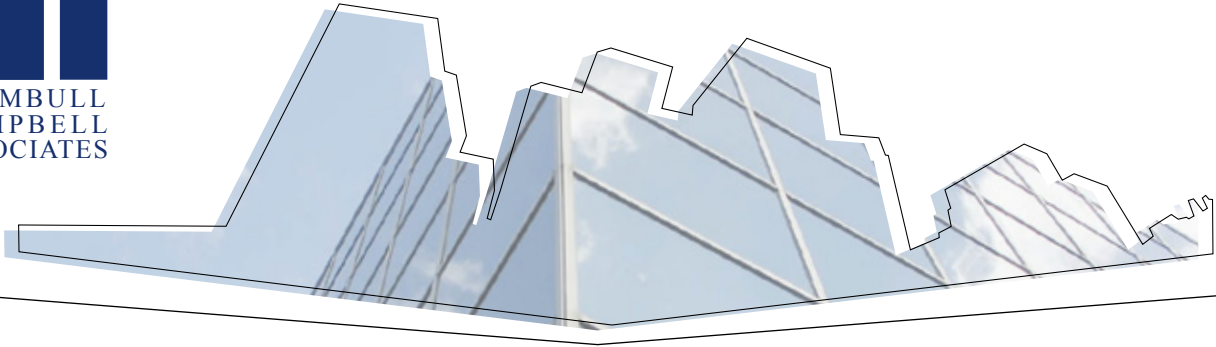

By partnering with these innovative manufacturers, Trumbull Campbell Associates offers a complete suite of customized solutions to fit any situation or application—from green building and energy usage requirements to retro-fitting, pollution control and design-build development needs. Trumbull Campbell Associates is proud to represent and support these leading manufacturers products:

▶▶ TRUMBULL CAMPBELL + AAON.

AAON is a world leader in creating comfortable, healthy and efficient indoor environments through the development and manufacturing of premium HVAC equipment. **AAON was chosen because they most exemplify our leading edge approach to environmental controls and ecological concerns.**

Together, Trumbull Campbell Associates and AAON provide a wide range of products for an even wider range of applications including air handling units, rooftops, self contained units, chillers and packaged pumping systems.

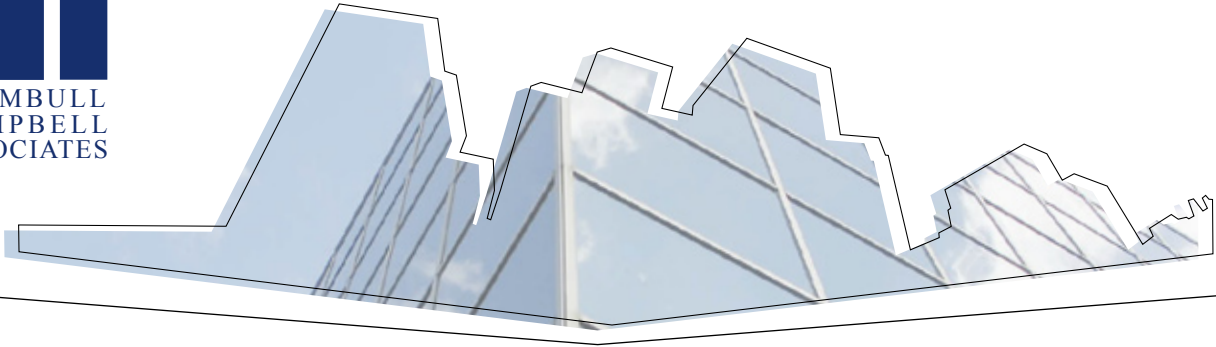

With a focus on efficiency and innovation, **AAON's product line incorporates the latest technologies to provide cutting edge solutions for architects, engineers, contractors and building owners. All AAON products are manufactured in the United States.**

Product Snapshot:

- RN Rooftop units 2 - 70 tons
- HB rooftops 2-5 tons
- RL Large tonnage packaged units 40 - 230 tons
- Central station air handling units 1,000 - 50,000 CFM
- Air cooled condensing units 2 through 230 tons
- SA self-contained units 23 - 70 tons
- BL boiler pumping packages
- LL chiller pump packages 35 - 365 tons
- Standard chillers 7 - 365 tons
- **Energy recovery**
- **Evaporative condensing**
- **Modulating hot gas reheat for dehumidification**
- **Digital scroll compressor technology**
- Residential split systems
- Heating and cooling coils

▶▶ TRUMBULL CAMPBELL + CLIMATECRAFT.

ClimateCraft is a leading provider of high quality, competitively priced commercial HVAC systems. By leveraging advanced computer technologies and an innovative manufacturing approach, **ClimateCraft produces extremely reliable air handlers with customizable features and easy operation, all at a reasonable cost.**

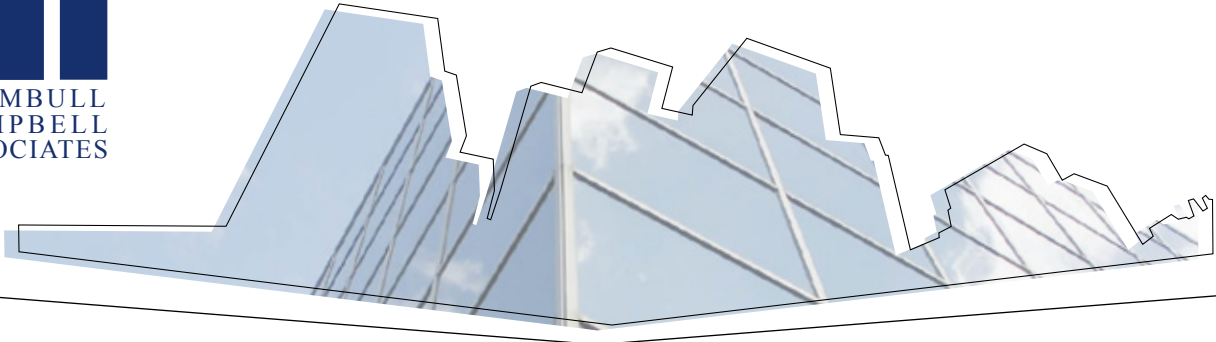

It is these new and different approaches to development and production—and a commitment to value and affordability—that led us to add ClimateCraft to our suite of products and services. **A partnership with ClimateCraft gives Trumbull Campbell Associates the flexibility to provide customers with the features and capabilities they need at price points that guarantee payback.**

Product snapshot:

- Unit panels constructed of heavy gauge G90 galvanized steel, 304 stainless steel and textured aluminum
- Meets high velocity hurricane zone requirements of Miami-Dade County and the Florida Building Code
- Bolted panel construction for field built applications
- Square foot manufacturing capable of handling large projects
- The only custom manufacturer certified for seismic per the IBC

▶▶ TRUMBULL CAMPBELL + DECTRON.

Dectron Internationale designs and manufactures indoor air treatment solutions to maximize health, productivity, comfort and quality of life. Through Dectron, Trumbull Campbell Associates offers three distinct product lines — Dectron | Circul-Aire | Ecosaire — with a wide variety of applications and uses.

Dectron

Large-scale dehumidifiers, pool heating applications and chlorine removal systems. Product snapshot:

- Pool, natatorium and water park dehumidification systems
- Capable of pool water heating
- Energy recovery systems
- Custom configurations available to meet the needs of every project

Circul-Aire

Sophisticated indoor air treatment and filtration systems for industrial applications. Product snapshot:

- Odorous and corrosive contaminants filtration
- High density scrubbers
- 250-3500 CFM air purification systems
- Universal side access filter housings
- Waste water treatment facility applications
- Dust collection systems

Ecosaire

Highly engineered, fully packaged systems for commercial, high-tech and industrial uses. Product snapshot:

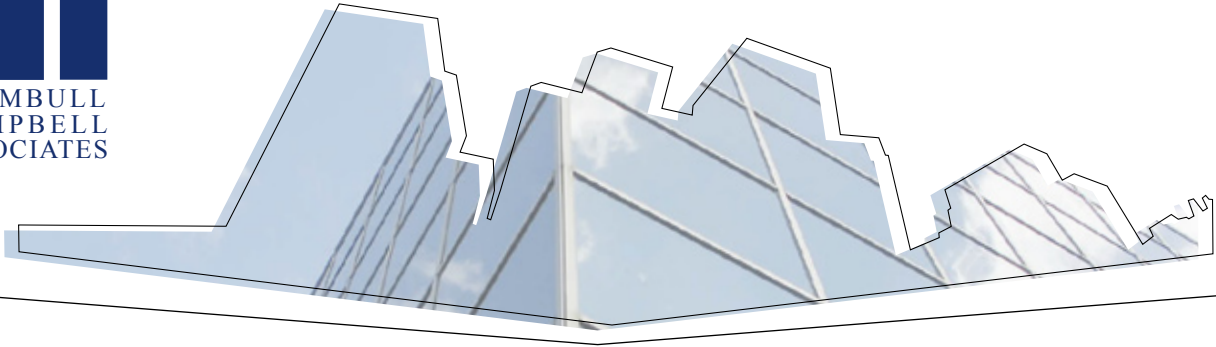

- Computer room units 3 – 30 tons
- Air purification systems 4 – 60 tons
- Spot cooling systems 1 – 10 tons
- Dry coolers

▷▷ TRUMBULL CAMPBELL + ECLIPSE.

ECLIPSE SCREEN SYSTEMS

Eclipse Screen Systems provides an extremely cost effective and simple way to screen HVAC equipment.

Trumbull Campbell Associates selected Skyline 2 screening from Eclipse Screen Systems because it gives architects and engineers the flexibility to add screening to any project, from a new construction to a retrofit overhaul, improving appearance and increasing performance.

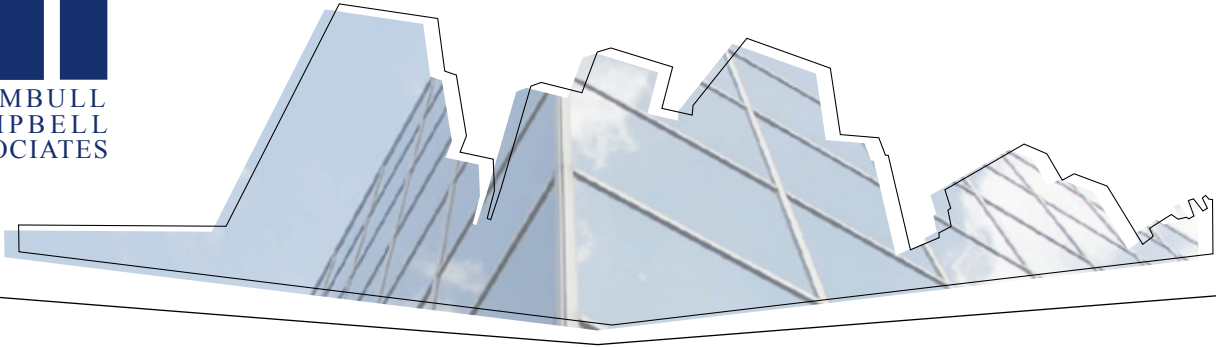

Skyline 2 screening can be installed without penetrating the roof or compromising the integrity or serviceability of the apparatus—no holes means no leaks. Skyline 2 screening can be configured in custom colors, is pre-engineered to withstand winds of 90 miles per hour and can be installed in 70% less time than other systems.

Product Snapshot:

- No roof penetrations-no leaks
- No equipment penetrations-no loss of equipment integrity
- Pre-engineered for 90 mph wind loading
- Custom panels and colors
- Minimum installation time
- Unrestricted access to all parts of equipment
- Applicable to all curb mounted equipment
- Significant savings versus field erected systems

▷▷ TRUMBULL CAMPBELL + GAYLORD.

At Trumbull Campbell Associates our goal was to offer **best-in-class ventilation systems for industrial kitchen applications**. When considering environmental concerns, building code requirements and the everyday safety of both restaurant staff and patrons, our choice was clear.

Working with Gaylord Industries, Trumbull Campbell Associates offers clients and customers premium and innovative options to **safely and efficiently incorporate commercial kitchen designs into any building project** — from a standalone restaurant construction to a retrofit project and even a mixed-use development.

Product snapshot:

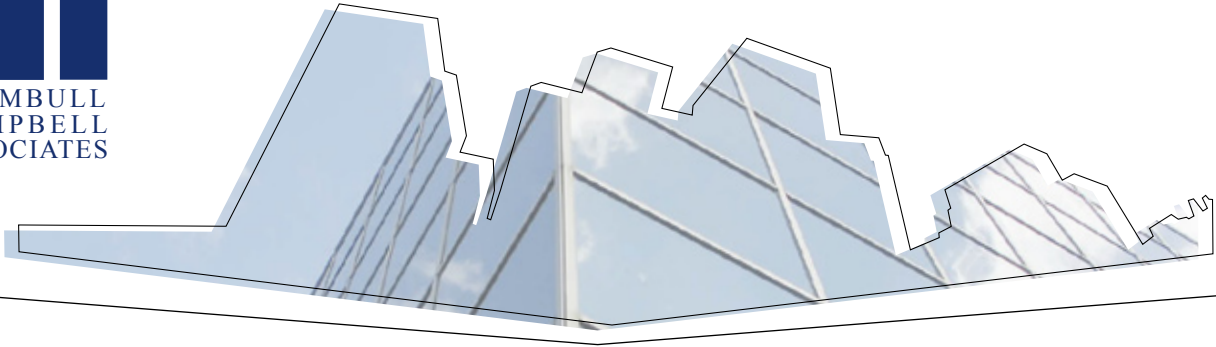

- Kitchen exhaust ventilators from 1,000-32,000 CFM
- Electrostatic precipitation—the most reliable cost effective method of removing smoke particles from a kitchen exhaust system
- Water wash systems
- UV systems
- Odor abatement options
- Custom kitchen hoods to fit all applications
- Fire suppression systems
- Kitchen utility distribution systems
- Melink kitchen ventilation control compatible
- Duct sumps

▷▷ TRUMBULL CAMPBELL + MARCRAFT.

MarCraft is known as an industry leader in the development, design and manufacturing of custom air handling equipment and other HVAC related products. **MarCraft equipment, designed for customers with specialized needs, fits well with our mission to provide customized solutions for hospitals, schools, clean rooms, research facilities, colleges and universities, water treatment facilities, food production and wash down areas and other precision applications.**

Through Trumbull Campbell Associates' unique approach to HVAC and MarCraft's highly adaptable capabilities, customers are limited only by imagination—if you can imagine it, we can help you build it.

Product snapshot:

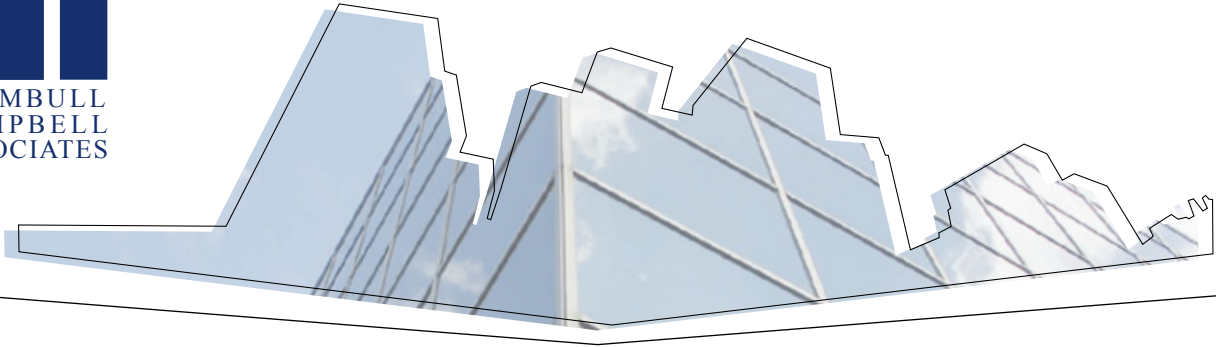

- True custom capabilities
- Aluminum, galvanized and stainless steel construction
- Corrosion protection
- Energy recovery
- Wash down construction
- Foam panel construction
- Extremely low leakage rates of 0.25% @ 12 inches of static pressure

▷▷ TRUMBULL CAMPBELL + MOTIVAIR.

motivair[™]

Motivair is a leading supplier of specialty chillers and cooling systems for data centers, hospitals, industrial sites, institutional buildings and commercial structures. **Known for quality, reliability and energy-savings—and chosen by a variety leading-edge organizations and Fortune 500 companies—Motivair products and installations are supported by a network of qualified refrigeration technicians.**

Through a product line that includes air cooled chillers, water cooled chillers, high density rack cooling, cooling systems, pump stations and compressed air treatment, partnering with Motivair gives Trumbull Campbell Associates the ability to provide support and service to the technology, research, and industrial firms that are driving the new economy.

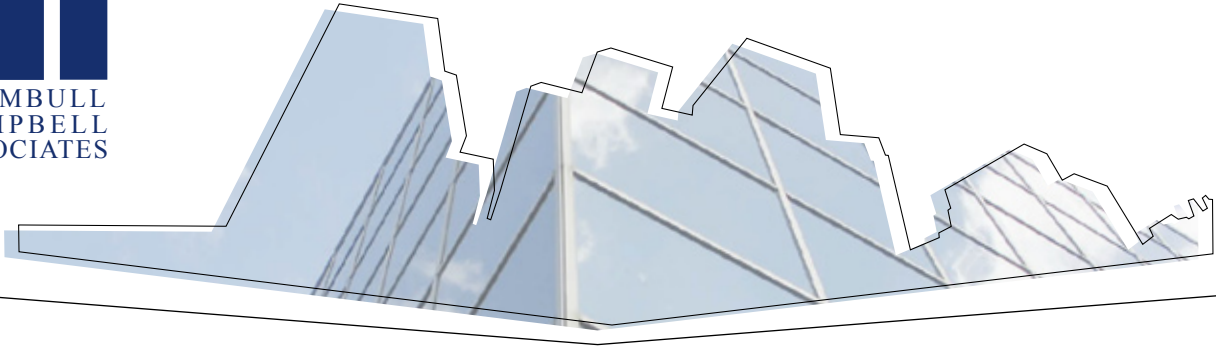

A true technology-focused company, Motivair shares Trumbull Campbell Associates' dedication to customer service, innovation and product evolution.

Product snapshot:

- Integrated free cooling chillers 60-350 tons with consistent winter time load
- Chiller pump packages/stand alone pump packages
- Air cooled and water cooled heat recovery chillers 60 -500 tons
- Medical equipment cooling chillers up to 50 tons capacity
- Chilled doors for data center cooling

▷▷ TRUMBULL CAMPBELL + SMARTD.

SMARTD

A relationship with Smardt allows Trumbull Campbell Associates to offer our customers the most efficient and quietest chiller with ARI certification on the market today. Chillers are available for air and water-cooled applications using the Danfoss-Turbocor compressor technology.

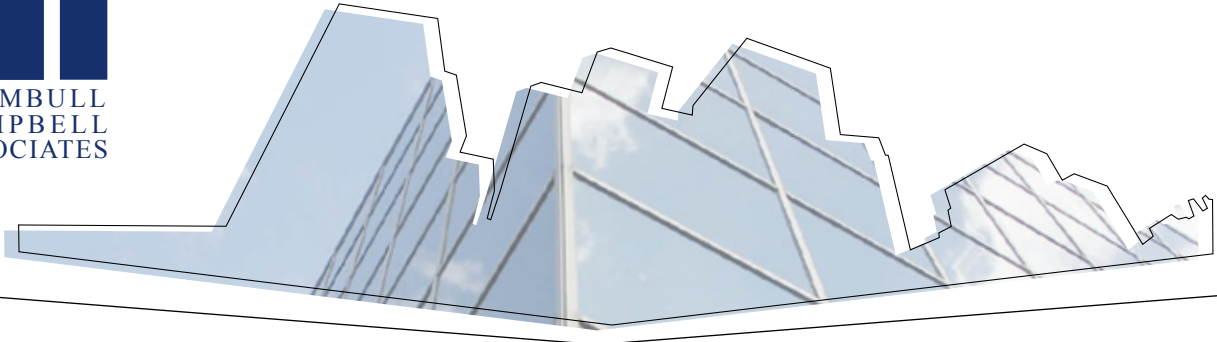

These units, renowned for their efficiency, quiet operational levels and the ability to accurately track the cooling load—saving money and guaranteeing payback over time—are changing the way internal environments are controlled.

Product Snapshot:

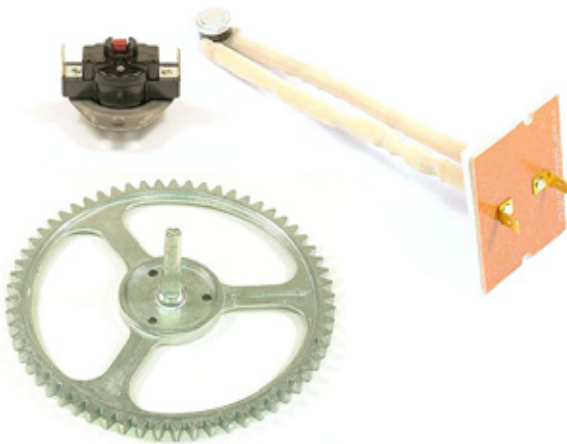

- Danfoss-Turbocor centrifugal compressor
- Magnetic bearing
- Oil free technology
- No metal to metal contact
- Integral VFDs to match cooling load profile
- Air cooled from 60-250 tons
- Air cooled IPLV as low as 0.61
- VFDs on condenser fans for reduced sound profile
- Water cooled from 60-1,000 tons
- Water cooled IPLV as low as 0.32
- Kiltech control system

▷▷ TRUMBULL CAMPBELL + PARTS.

Trumbull Campbell Associates knows HVAC, the trends, the leading edge technology, and how it all fits together. We also know your needs go well beyond design and implementation. Because of this, we offer a responsive, well stocked parts department to continue our commitment to you throughout the entire life of the equipment.

Although it may be impossible to stock every component, we do our best to make sure we have all the necessary seasonal parts available and ready for shipment—to ensure your systems are up and running efficiently.

Parts Department Snapshot:

- High Quality OEM parts (Aaon, Dectron, Orion Control Systems and WattMaster Controls)
- Competitive pricing on OEM parts
- Same day shipping—minimizing your downtime
- Fast, efficient, live customer service and support
- Warranted parts replacement

Contact us on line at trumbullcampbell.com or
Call our parts department at (978) 225-2045 extension 201.
